HOW TO REPLY TO THIS NOTICE:

I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

B. If the status above is to be removed, check box 5b on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above, or

DETAILED ACTION

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Walt Froloff on 07/16/08.

The application has been amended as follows:

In the Abstract of the Specification the word "Discloses" is deleted.

Regarding claim 1 (currently amended) A system for processing emotive vectors comprising;

at least one computing device,

computer memory, and

electronic computing device data communication medium,

at least one application executing on the device coding emotive vectors, and

the application coding emotive content by preserving emotive vectors with associated

text in the electronic communication whereby software instructions stored in memory are

under control of the computing device for processing and transmitting emotive vectors over

the electronic communication medium, each emotive vector comprising an emotive state

from a set of feelings and an associated emotive intensity normalized to the author in a

given scale with a minimum and maximum intensity, and with associated text embedded in electronic device communications.

Regarding claim 10 (currently amended) A method of ~~encoding~~ emotive vectors, each emotive vector comprising an emotive state from a set of emotive states and an associated emotive intensity normalized to the author to a given scale with a minimum and maximum intensity, with associated text in electronic communications, comprising the steps of:

reading the emotive vector into a computer memory from ~~an electronic computing~~ communication medium ;

decoding by decoupling the emotive vector from text in the communication;

processing emotive vector ~~at~~ with ~~least one computing~~ the device,

encoding the emotive vector and

encoding emotive content by preserving emotive vectors with associated text in the electronic communication, and

transmitting the emotive vector to ~~another computing~~ an electronic device via electronic communication.

Regarding claim 16 (currently amended) A computer program residing on a computer-readable media, said computer program communicating emotive content comprising emotive vectors, each emotive vector comprising an emotive state and an associated emotive intensity in a given scale with a minimum and maximum intensity normalized to the author with associated text embedded in electronic device communications, comprising the steps of:

reading and translating the emotive vector from the emotive content into a computer memory from an electronic ~~computing~~ device medium;
decoding and encoding emotive content by preserving emotive vectors with associated text in the electronic communication, and
processing emotive vector with at least one ~~computing~~ electronic device, and
transmitting the emotive vector to another ~~computing~~ electronic device.

Allowable Subject Matter

Claims 1-18 are allowed over the prior art of record.

The following is an examiner's statement of reasons for allowance: Applicant has claimed uniquely distinct features in the instant invention which are not found in the prior art either singularly or in combination. They are a system for processing the application coding emotive content by preserving emotive vectors with associated text in the electronic communication whereby software instructions stored in memory are under control of the computing device for processing and transmitting emotive vectors over the electronic communication, each emotive vector comprising an emotive state from a set of feelings and an associated emotive intensity normalized to the author in a given scale with a minimum and maximum intensity, and with associated text embedded in electronic device communications. The closest prior art, Hatlelid discloses a conventional Hatlelid uses moods, personalities and behavior, ie. emotive contents "largest effect", for the purposes of improving an electronic interface through animation graphics representative of behavior indicative of moods and personalities; either singularly or in combination, fail to anticipate or render the above limitation obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Cao (Kevin) Nguyen whose telephone number is (571)272-4053. The examiner can normally be reached on 8:30AM-5:00PM.
